

# COST IMPROVEMENT PROGRAMMES (CIP)

## BACKGROUND

An NOA member organisation asked us for help setting up an exercise to share ideas and learning around the identification of CIP schemes for 2019/20. The proposal generated a lot of interest across the NOA membership, and in March, 2019 the NOA held its first CIP sharing workshop.

## WHO'S INVOLVED

Finance and procurement colleagues from across the NOA.

## WHAT WE'VE DONE

We've held CIP workshops which included presentations from attendees highlighting CIP achievements, challenges and lessons learned as well as themed breakout focus groups helped Trusts prepare for business planning. We also organised free sessions for RNOH staff to support further understanding of the orthopaedic opportunities within Model Hospital.

## HIGHLIGHTS IN NUMBERS

- 3 CIP workshops held with 67 attendees in total
- 2 Model Hospital training sessions with 26 attendees

## WHAT'S NEXT

Following the CIP workshops, we surveyed members and are planning what the most useful workshops around CIP will be. In the new NHS climate we're working to formulate the most useful ways to support our members' CIP plans.

## WHAT MEMBERS THINK

"It's great to have forums such as NOA's CIP workshop to share experiences of cost improvement programmes with colleagues across different Trusts. From tracking CIP schemes to SLA review processes and procurement, we were all able to share and discuss the many aspects of CIP that affect our business planning and delivery of care."
