

HOW THE NOA IS WORKING TO IMPROVE...

COST IMPROVEMENT PROGRAMMES

BACKGROUND

An NOA member organisation asked us for help setting up an exercise to share ideas and learning around the identification of CIP schemes for 2019/20. The proposal generated a lot of interest across the NOA membership, and in March 2019 the NOA held its first CIP sharing workshop.

WHO'S INVOLVED

Finance and procurement colleagues from across the NOA network.

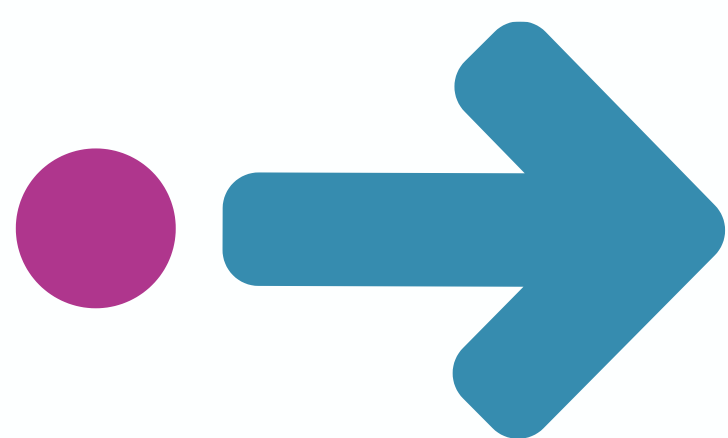

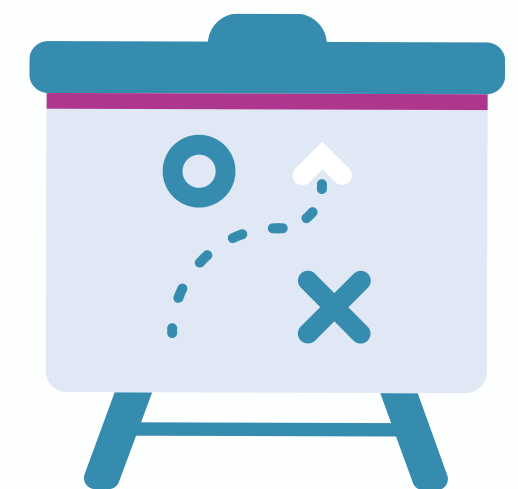

WHAT WE'VE DONE

We have hosted annual CIP workshops which included presentations from attendees highlighting CIP achievements, challenges and lessons learned as well as themed breakout focus groups to help Trusts prepare for business planning. We also organised free sessions for RNOH staff to support further understanding of the orthopaedic opportunities within Model Hospital.

HIGHLIGHTS IN NUMBERS

- **3** CIP workshops held with 67 attendees in total
- **2** Model Hospital training sessions held with 26 attendees

WHAT'S NEXT

Following the CIP workshops, we will continue to survey members to understand what the most useful workshops around CIP will be. In this new NHS climate we're working to formulate the most useful ways to support our members' CIP plans.

WHAT MEMBERS THINK

"It's great to have forums such as NOA's CIP workshop to share experiences of cost improvement programmes with colleagues across different Trusts. From tracking CIP schemes to SLA review processes and procurement, we were all able to share and discuss the many aspects of CIP that affect our business planning and delivery of care." **Amanda Gaston, Royal Orthopaedic Hospital**
